

# STARK 37 - STARK 42 Brushcutters

**5** Flywheel designed to guarantee smoother operation of engine and optimize engine cooling even in adverse weather conditions (*high temperatures*).

**6** Piston with 2 rings (STARK 42), and nickel-plated cylinder constant efficiency assured over time, even in tough operating conditions.

**7** Controls located immediately to hand throttle trigger, palm-operated safety switch, on/off lockout switch all incorporated into handle.

**4** "Primer" ensures easy starting from cold, after refuelling, or following lengthy idle periods.

**3** 0.87 litre fuel tank capacity together with low specific fuel consumption, extends the intervals between refuelling stops.

**2** Cloth air filter element edged with elastomer: guaranteed more effective, especially in dust-laden environments, and simplifies maintenance.

**1** Transmission with steel shaft carried in 5 flexible bushings ensures strong resistance to stresses, reducing vibrations.

**Professional 2-stroke engine with capacitive electronic ignition** guarantees high performance, easy starting, long life, and compliance with EURO I / EPA I standards.
